SUMMARY

Results-driven software developer specializing in full stack mobile and web application development using React Native, Node.js, and MongoDB. Proven expertise in creating scalable, high-performance applications with a focus on user experience, backend efficiency, and API integration. Adept at working in agile environments with strong communication, problem-solving, and debugging skills. To secure a software engineering position in a growth-oriented company where I can contribute to building scalable systems, deepen my full-stack development expertise, and innovate solutions to real-world challenges using modern technologies.

ASPIRATION

To secure a software engineering position in a growth-oriented company where I can contribute to building scalable systems, deepen my full-stack development expertise, and innovate solutions to real-world challenges using modern technologies.

WORK EXPERIENCE

Intern – ForgeVision.ai

(August 2025 – December 2025)

- Worked on designing and developing software for the **OptiWaste** unit. (Deployed in **JW Marriot** and **Lalit Delhi**)
- Built and optimized application features to improve waste management workflows.
- Collaborated with team members to implement efficient backend logic.
- Integrated APIs and improved system performance.
- Participated in debugging, testing, and deployment processes.
- Gained hands-on experience with real-world software development practices.

Open Source Contributor

[GitHub](#) | Various Organizations

- Actively contributed to multiple open-source projects across various organizations.
- Enhanced features, resolved bugs, and improved documentation.
- Collaborated globally via Git and pull requests to learn best practices.

PROJECTS

Project – Gesture Genius

- Developed an AI-based multimodal system for hands-free gaming and Windows control.
- Implemented real-time gesture, eye-gaze, head, and facial tracking using computer vision.
- Enabled VR-like gameplay for GTA V, Valorant, Minecraft, Forza Horizon using only a webcam, removing VR hardware costs.
- Built a low-latency, non-invasive solution focused on immersive and accessible gaming.

BlueChat – Decentralized Offline Messaging App

- Built a peer-to-peer chat application enabling communication without internet connectivity.
- Implemented Bluetooth-based device discovery and message exchange.
- Designed a multi-device relay system where messages can hop across nearby devices.
- Integrated end-to-end encryption for secure conversations.

EDUCATION

Shri Shankaracharya Technical Campus (SSTC), Bhilai

(August 2023 – Present)

Bachelor of Technology (B.Tech), Industrial Production

- Private technical institute in Bhilai, Chhattisgarh, offering engineering and research-oriented programs.
- Approved by AICTE and affiliated to Chhattisgarh Swami Vivekanand Technical University.

SKILLS

Languages: Kotlin, JavaScript, Python, C++, Express.js, React Native, TypeScript (Basic), Node.js

Backend & Database: MongoDB, Firebase, REST APIs, ServiceNow Platform, SQL

Concepts: Mobile-First Design, API Integration, Modular Architecture, Agile Development

Tools & Platforms: Expo, Android Studio, Git, Postman, VS Code, GitHub, Jupyter Notebook

Soft Skills: Communication, Adaptability, Leadership, Teamwork

CERTIFICATIONS&EXTRACIRRICULARS

- Engaged in multiple **hackathons** to develop practical coding and teamwork skills.
